## L'azienda

Piralla è un marchio storico di rubinetteria italiana registrato dalla Renato Piralla S.r.l. la quale, nel corso del 2014, è stata acquistata, come socio unico, dalla Paini S.p.A. Rubinetterie. La direzione ed il coordinamento da parte della medesima permette la progettazione e la produzione degli articoli presenti in questo catalogo, anticipando così le continue evoluzioni del mercato con un marchio diverso da quello primario e di permettere alla propria clientela di avere dei prodotti con parametri qualitativi e tecnologici di alto livello.

Paini, con questa ultima acquisizione, ha raggiunto un polo produttivo di circa 80.000 mq. con una forza lavoro di circa 400 dipendenti.

La manodopera è attualmente specializzata ed è preparata anche per mezzo di corsi professionali interni; sono previsti stage dedicati a studenti d'istituti tecnico-commerciale.

Siamo in grado di proporre un'ampia gamma di rubinetteria: monocomando, arredobagno e cantiere, per ambienti da cucina, bagno e doccia. L'attuale produzione annua è di circa 4 milioni di pezzi. Il ciclo produttivo prevede l'utilizzo esclusivo di materie prime di qualità superiore, rispondenti alle rigorose norme UNI-CEE. Il Centro Ricerche è dotato di laboratori di prova ed analisi per studi ed acquisizione d'esperienze su problematiche meccaniche,

chimiche e funzionali. La produzione è completamente interna ed a ciclo completo, con ampio utilizzo di tecnologie moderne su macchine transfer e multimandrino. I controlli di qualità sono eseguiti in tutte le fasi di produzione e lavorazione, da quelle principali a quelle aggiunte. A questo scopo sono utilizzati anche strumenti automatici, programmati secondo precisi protocolli di valutazione per ogni lavorazione. La pulitura finale dei pezzi può essere robotizzata come manuale, a seconda delle problematiche di produzione e del livello di finitura di ogni singolo pezzo. L'impianto di cromatura è uno dei più grandi del mondo nel settore della rubinetteria. Assicura automaticamente lo standard di spessore delle cromature richiesto dalle normative internazionali. I singoli pezzi viaggiano su telai trasportati per via aerea su birotaia elettromeccanica. La verniciatura avviene internamente, con procedimenti di copertura sia a polvere epossidica che a liquido. Particolarmente apprezzabile l'impianto a trattamento P.V.D., impianto che permette di ricavare finiture più resistenti a quelle tradizionali. I ns. prodotti rispondono agli standard internazionali di molti enti d'Unificazione ed è una delle poche aziende italiane del settore a disporre per i propri prodotti dei marchi d'omologazione IAPMO validi per gli U.S.A.

## The company

Piralla is a long-established Italian brand registered by Renato Piralla S.r.l., acquired as sole shareholder by Paini S.p.A. Rubinetterie in 2014.

Paini management enables conception and manufacturing of the items listed in this catalogue, anticipates the steady evolutions of the market with a different brand and allows customers to get products with high quality and technology.

With this latest acquisition, Paini has implemented a production plant of almost 80.000m<sup>2</sup> with around 400 employees.

The staff are highly specialised and educated also through in house refresher courses. We also offer stages to students from technical and wide range of taps - mixers, bathroom accessories and ship-building industry, kitchen, bath and shower associated products. We proudly produce 4 million pieces per annum. The production cycle provides the usage of high quality raw materials only, in conformity with the strict UNI-CEE standards. Our Research Centre Team provides test laboratories and analysis aiming at studying and gaining experience on mechanical, chemical and functional problems. The production is completely carried out in house utilising a wide range of modern technological production disciplines on transfer and multi-spindled machines. Quality tests are carried out during all production and handling steps, from the

main to the secondary ones. To this aim computerised equipment programmed according to specific evalution protcols for each handling are used. Final polishing of the pieces can be both robotized and manual, according to the production problems and the finish level every single piece should provide.

The chromium plating plant system is one of the largest in the industry and automatically assures the chromium thickness standard in conformity with international norms.

Pieces are carried on air frames sliding on an electromechanical birail. On site we also provide colouring plants using epoxidic powder and liquid. PDV facility proves great success, enabling to get finishes of higher resistance than the traditional ones. Our products meet the international standards of several Union agencies and is one of the few Italian companies in the industry to provide IAPMO certificates, which are valid for the U.S.A. market.

I rubinetti temporizzati Piralla hanno un filtro incorporato ed una cartuccia realizzati con materiali speciali ed avanzate caratteristiche tecniche, consentendo un sicuro e buon funzionamento nel tempo a costi contenuti.
